## Applied Geomechanics in Petroleum Engineering

Guest Editor:

**Prof. Dr. Hazim H. Abass**

Department of Petroleum  
Engineering, Colorado School of  
Mines, 1500 Illinois St, Golden, CO  
80401, USA

Deadline for manuscript  
submissions:

**closed (25 February 2021)**

### Message from the Guest Editor

Dear colleagues,

Petroleum engineering has been the discipline of vital importance in meeting the global demand for energy. Geomechanics has evolved to become a critical area in petroleum engineering. Although drilling a well, whether vertical, deviated or horizontal, is the main vehicle to produce oil and gas from deep reservoirs, it also serves reaching for coal, geothermal energy, gas hydrates, and CO<sub>2</sub> sequestration.

This Special Issue will focus on all geomechanics problems related to drilling a well into reservoirs at depths for all the objectives mentioned above and the processes occurring in the reservoir following well penetration. Therefore, technical papers are invited in all geomechanics-related areas such as wellbore stability, cementing, perforation, hydraulic fracturing, production, reservoir compaction, subsidence, sand production, geothermal reservoir engineering, gas hydrate production, waste disposal, and CO<sub>2</sub> sequestration. Papers of multidisciplinary nature that present innovative solutions are highly encouraged. These geomechanics applications can be related to conventional and unconventional reservoirs.

Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
