## Underground Coal Gasification: Clean Technology of the Coal Energy Conversion

Guest Editors:

**Prof. Dr. Marek Laciak**

Institute of Control and Informatization of Production Processes, Faculty BERG, Technical University of Kosice, Letná 1/9, 040 01 Košice, Slovakia

**Dr. Ján Kačur**

Institute of Control and Informatization of Production Processes, Faculty BERG, Technical University of Kosice, Letná 1/9, 040 01 Košice, Slovakia

**Dr. Milan Durdán**

Institute of Control and Informatization of Production Processes, Faculty BERG, Technical University of Kosice, Letná 1/9, 040 01 Košice, Slovakia

Deadline for manuscript submissions:

**closed (10 September 2024)**

### Message from the Guest Editors

This Special Issue focuses on **energy conversion** processes in **underground coal gasification (UCG)**, including the **modelling** and **optimization** of this process and the impact of UCG technology on the environment. UCG technology is an unconventional and new coal mining method. This continually evolving technology is a large energy source that can be obtained at a lower cost and safer than convection mining. The UCG process transforms the coal's energy into the gas produced (i.e., syngas). For successful energy conversion, i.e., obtaining syngas with a higher calorific value, it is essential to develop new methods, approaches, and physical and mathematical models. The developed methods and models can improve the prediction of the UCG process state. We should not forget that this technology is also associated with many underground uncertainties and environmental impacts.

We invite you to submit your original papers to the Special Issue "Underground Coal Gasification: Clean Technology of the Coal Energy Conversion", and we look forward to receiving your outstanding research.

Aerospace Engineering,  
University of Roma Sapienza, Via  
Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
