Deadline for manuscript
submissions:

19 June 2024

Message from the Guest Editors

Dear Colleagues,

This Special Issue will include recent development regarding the components, topology and control of high-power electronics in distribution grids. Topics of interest for publication include, but are not limited to:

- Power semiconductors and components for high-power electronic systems;
- Topologies of high-power converters;
- Power electronic transformers;
- Multi-port power conversion systems;
- High-efficiency high-power-density power conversion technology;
- Converter controls and energy management systems for grids;
- Architecture, operation and protection of grids;
- Simulation and testing methods;
- Future vision for next-generation grids and high-power electronic systems;
- Other advanced technology in this area.

Dr. Shiqi Ji
Dr. Zhiyong Yuan
Dr. Li Zhang

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
