Engineering, West Pomeranian
University of Technology,
Szczecin, Poland

Deadline for manuscript
submissions:

closed (4 April 2023)

Message from the Guest Editor

Dear Colleagues,

This Special Issue will focus on novel techniques for determining the influence of various fuels (e.g., vegetable) and methods for their preparation on the wear of modern injection units and engine performance. This Special Issue will focus on, but is not limited to, the following themes:

- Fuel pretreatment systems;
- Modern CI engines;
- Environment pollution;
- Emission of toxic substances from engines;
- Power supply for engines;
- Engines injection systems;
- Engine control.

Prof. Dr. Karol F. Abramek

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
