### Message from the Guest Editors

This Special Issue welcomes contributions from researchers in the electrochemical, material, physical and electrical science and engineering fields on the following topics:

- Battery management system;
- Battery energy management system;
- Advanced battery thermal management system;
- SOC, SOE, SOH estimation for battery management systems;
- Safety monitoring of rechargeable batteries;
- Cathode/anode design for lithium-ion battery and lithium metal battery;
- Advanced electrolyte optimization;
- Solid-state battery;
- Aqueous batteries;
- Novel battery system design.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
