## Ionic Liquids in Energy and Environment

Guest Editor:

**Dr. Denis Prodius**

Ames Laboratory, US Department of Energy and Critical Materials Institute, Ames, IA 50011, USA

Deadline for manuscript submissions:

**closed (31 December 2021)**

### Message from the Guest Editor

The ionic liquids, also known as molten salts and future solvents, are endowed with unique features that already have had a cutting-edge impact on promising science and technologies.

This Special Issue aims to address the current challenges associated with the energy-efficient design, recovery, recycling, and separation of valuable materials employing ionic liquids, including, but not limited to:

- Recovery and separation of rare earths and other valuable metals
- Electrodeposition from ionic liquids
- Recycling of waste (bio, plastic, electronic, etc.)
- IL-based electrolytes for battery technologies
- Environmental impact of ionic liquids

### **Prof. Dr. Enrico Sciubba**

Department of Mechanical and  
Aerospace Engineering,  
University of Roma Sapienza, Via  
Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
