Life Cycle Assessment (LCA) of Environmental and Energy Systems

Guest Editors:

Prof. Dr. Fabrizio Passarini

Department of Industrial
Chemistry “Toso Montanari”,
Alma Mater Studiorum-University
of Bologna, 40136 Bologna, Italy

Dr. Luca Ciacci

Department of Industrial
Chemistry, University of Bologna,
viale Risorgimento, 4, 40136
Bologna, Italy

Deadline for manuscript
submissions:

closed (31 March 2020)

Message from the Guest Editors

Dear Colleagues,

The transition towards renewable energy sources and “green” technologies for energy generation and storage is expected to mitigate the climate emergency in the coming years. Many studies have shown that environmental and energy issues are strictly interconnected and require a comprehensive understanding of resource management strategies and their implications. A system perspective is hence needed to identify and quantify the impact of human activity on the environment. Life cycle assessment (LCA) is among the most inclusive analytical techniques to analyze sustainability benefits and trade-offs resulting from complex systems. This Special Issue welcomes original articles, reviews, and case studies focusing on mutual influences of environmental and energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
