## Advances in Efficient Thermal Conversion of Carbon-Based Fuels

Guest Editors:

**Dr. Xiaobin Qi**

Institute of Engineering  
Thermophysics, Chinese  
Academy of Sciences, 11 North  
Fourth Ring Road West, Haidian  
District, Beijing 100190, China

**Dr. Mingxin Xu**

National Engineering Research  
Center of New Energy Power  
Generation, North China Electric  
Power University, Beijing 102206,  
China

Deadline for manuscript  
submissions:

**28 September 2024**

### Message from the Guest Editors

Since inception, humans have continuously obtained the energy and materials necessary for survival and development from carbon-based resources in nature, to then discharge the carbon-containing waste back into nature. Although we have lived peacefully in this world composed of carbon elements for nearly a million years, we have never as alarmed about the potential threat posed by the imbalanced carbon cycle to human life under today's severe environmental pressures. Faced with the adverse situation of the extensive use of carbon-based fuels, sufficient attention should be devoted to this issue in order to reverse the traditional extensive utilization of carbon-based fuels.

By establishing this Special Issue, we hope to explore the thermal conversion characteristics and advanced utilization technologies of various carbon-based fuels, as well as the pollutant emissions and prevention measures in the thermal conversion process, thus providing a reference for the clean, low-carbon, and efficient utilization of carbon-based fuels.

Aerospace Engineering,  
University of Roma Sapienza, Via  
Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
