College of Energy, Xiamen
University, Xiamen 361102, China

Deadline for manuscript
submissions:

11 February 2025

Message from the Guest Editors

Dear Colleagues,

Urban cities are facing enormous challenges in meeting their surging energy demand while decreasing carbon emissions. In recent years, low-carbon energy systems attract great attention and are deemed as essential means for realizing sustainable cities. However, there are existing obstacles and research gaps in low-carbon energy system management towards sustainable cities. Developing efficient and intelligent solutions for low-carbon energy system management is a complex challenge involving interdisciplinary knowledge and expertise. This special issue, therefore, provides a forum for researchers and scientists to exchange novel research solutions and results to tackle challenges and obstacles in this domain. The detailed topics of interest include, but are not limiting to, the following:

- Urban energy systems
- Energy storage systems
- Low-carbon energy technologies
- Optimization and control techniques
- Big data, smart energy, and smart cities
- Energy efficiency and flexibility in buildings
- Urban energy resilience, policy, and economics
- Urban energy-water nexus
- District heating and CCHP in urban cities

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
