## Magnetic Field Computations and Energy Efficiency Studies in Electrical Machines

Guest Editors:

**Dr. Dan-Cristian Popa**

Department of Electrical  
Machines and Drives, Technical  
University of Cluj-Napoca, 28  
Memorandumului Street, 400114  
Cluj-Napoca, Romania

**Prof. Dr. Emil Cazacu**

Department of Electrotechnics,  
Faculty of Electrical Engineering,  
University “POLITEHNICA” of  
Bucharest, Splaiul Independentei  
313, Sector 6, 060042 Bucharest,  
Romania

Deadline for manuscript  
submissions:

**10 September 2024**

### Message from the Guest Editors

Dear colleagues,

This Special Issue aims to publish studies on Transverse Flux Machines based mainly on, but not limited to Magnetic Field Computations and Energy Efficiency Studies. These analyses are challenging for the researchers as the topology of this type of electric machine is usually complicated and can be subject to various innovations in order to make it attractive for series production. Given the above considerations, topics of interest are:

- Innovative design of rotary and linear machines, with or without permanent magnets
- Techniques for optimization
- Analytical and numerical electromagnetic analysis
- Application of new magnetic materials
- Thermal and mechanical simulations
- Control strategies
- Noise, vibration and heat analysis on transverse flux machine
- Energy Efficiency Studies
- Energetical Optimisation Analysis

Aerospace Engineering,  
University of Roma Sapienza, Via  
Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
