Deadline for manuscript  
submissions:

**closed (30 November 2020)**

### Message from the Guest Editor

Dear colleagues,

This Special Issue will focus on all aspects of DEM (discrete element method) and CFD-DEM simulation from fundamental research to applications. We encourage the development of algorithms for efficient calculation, unprecedented application, and utilization of AI.

### Keywords:

- discrete element method
- discrete particle simulation
- computational fluid dynamics
- numerical analysis
- multiphase flow
- powder processing
- DEM
- CFD-DEM

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
