### Message from the Guest Editor

This Special Issue will highlight research in the broader areas of energy and environmental sustainability. More and more emphasis is being placed on sustainable energy technologies or processes that make conventional energy technologies more sustainable. Life cycle environmental impacts and energies are used as a way to compare these different technologies. This Special Issue will identify articles that address some of these broader issues. Topics could include life cycle analyses that focus on emissions or energy, the food–water–energy nexus, sustainable energy technologies, waste to energy, etc. Please note that this is not a comprehensive list. We will consider research as well as review articles.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
