Nuclear and Solid Waste Disposal and Management

Guest Editor:

Prof. Dr. Walter Wildi

Department of Environmental
and Aquatic Sciences, Faculty of
Sciences, Section of Earth and
Environmental Sciences,
University of Geneva, 1205
Geneva, Switzerland

Deadline for manuscript
submissions:

closed (20 June 2020)

Message from the Guest Editor

The Guest Editor is inviting submissions to a Special Issue of *Energies* on the subject area of “Nuclear and Solid Waste Disposal and Management”.

Military nuclear waste has been produced since the end of the Second World War, whereas waste production from civil nuclear reactors started in the 1960s. First tentative solutions for the elimination of such waste included the injection of liquid waste in deep geological reservoirs and ocean dumping. During the 1960s, international research on sea bed disposal was conducted and abandoned after the adoption of the London Convention. During the following years, the concept of geological “final disposal” in the continental crust was widely accepted by the international community. However, 50 years later, we note that not one single safe and sustainable geological long-term disposal facility has been constructed and operated with success. In particular, incidents and accidents such as the water infiltration in the Asse repository in Germany, or the fire in the WIPP facility in New Mexico (USA), are indicators of inappropriate processes and technologies, weak institutions, and other failures...

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
