Advanced Engineering and Green Energy

Guest Editors:

Dr. Ivaylo Stoyanov

Department of Power Engineering, University of Ruse, 7004 Ruse, Bulgaria

Dr. Teodor B Iliev

Department of Telecommunications, University of Ruse, 7017 Ruse, Bulgaria

Dr. Bogdan Popa

Department of Hydraulics, Hydraulic Machines and Environmental Engineering, Faculty of Energy Engineering, University Politehnica of Bucharest, RO-060042 Bucharest, Romania

Deadline for manuscript submissions:

closed (29 February 2024)

Message from the Guest Editors

Applications of green energy and sustainable development have been receiving increasing attention, especially in the field of renewable energy sources are in continuous dynamics, significantly improving their efficiency in recent years, as well as their cost. There are trends for reduced energy consumption, improvement of energy security, and accelerated transition to the so-called green energy and green economy. Smart energy technologies are endowing the tendency to throw open the capabilities of new technologies and engineering solutions to increase the share of renewable energy sources in the energy mix, improve energy efficiency, and better management of energy flows at all levels—energy production and transmission, consumption by households, etc.

This Special Issue aims to present and disseminate the most recent advances related to the theory, investigation, simulation, practice, and assessment of renewable energy sources and green technologies concerning energy efficiency consumption, utilization, and thermal comfort issues, and their implementation in smart cities, electric vehicle, and energy forecasting strategies for the sustainable engineering and technologies.

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
