Offshore Floating Wind Farms

Guest Editor:

Prof. Dr. Haixiao Liu

State Key Laboratory of
Hydraulic Engineering Simulation
and Safety, Tianjin University,
Tianjin 300072, China

Deadline for manuscript
submissions:

closed (20 April 2023)

Message from the Guest Editor

We are planning a Special Issue for the journal *Energies* with the title of “offshore floating wind farms”. This issue covers a broad range of topics relevant to an offshore floating wind farm. Any interesting topics that are meaningful to the design, analysis, installation and operation of an offshore floating wind farm are welcome and encouraged to be prepared as a paper for this Special Issue. Several topics include (but not limited to): the site determination, the design and optimization of a wind farm, the power evaluation, the wind velocity distribution and wake effects, the aerodynamic and hydrodynamic analyses, the novel type of a large floating structure for wind farm applications, and the CFD modelling of a large wind farm. However, topics that only involve a single wind turbine are inappropriate for this Special Issue.

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
