## Optimisation Models and Methods in Energy Systems

Guest Editor:

**Prof. Dr. Carlos Henggeler  
Antunes**

INESC Coimbra, Department of  
Electrical and Computer  
Engineering, University of  
Coimbra, Polo 2, 3030-290  
Coimbra, Portugal

Deadline for manuscript  
submissions:

**closed (6 May 2019)**

### Message from the Guest Editor

Contributions are expected to cover a wide range of topics including: Electricity smart grids; gas smart grids; district heating/cooling; integration of renewable generation; storage; demand side management and demand response; selection and location of equipment including communication issues; system reliability and provision of ancillary services; market design and operation. Further topics related to optimization models and methods to tackle challenging problems in energy networks and systems, namely regarding the evolution to smart grids, are welcome. Contributions reporting real-world case studies are particularly appreciated.

Papers must contain original research results including comprehensive mathematical models, algorithmic advances and extensive numerical experiments. Numerical illustrations cannot be toy examples, but real or realistic case studies for which all data should be provided (in the paper or as supplementary material) to ensure the replicability of results. The research reported in contributed papers should convey novel and significant work relative to the relevant literature.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
