### Message from the Guest Editor

Dear Colleagues,

This Special Issue aims to present solutions based on sensor systems, tomography, and IT, as well as electrotechnical and electronic systems using machine learning and optimization that can potentially be used in industry, environmental work, or medicine.

The main emphasis will be on interdisciplinary work and research fields that include experimental, theoretical, and computational work focused on artificial intelligence, data analysis, and data interpretation.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
