Sustainable Finance Initiative,
Precourt Institute for Energy,
Stanford University, CA 94305,
USA

Deadline for manuscript
submissions:

closed (25 April 2022)

Message from the Guest Editor

Dear Colleagues,

It is my pleasure to invite you to submit your paper for consideration in MDPI's Special Issue entitled "Policy and Finance for Clean Energy Transition". This issue will focus on policy and finance for the energy system transition required to reach our ambitious climate targets.

In this context, energy system transition means not only deploying more green technologies (e.g., solar, wind, battery storage, electric vehicles, hydrogen, etc.) but also deploying less brown technologies (e.g., coal, natural gas, etc.). It also means developing infrastructure that enables the brown to green transition, e.g., modification of natural gas pipelines for carrying (green) hydrogen.

Furthermore, while the focus is on (ex-post) analysis and (ex-ante) design of policies (e.g., subsidies) and financial instruments (e.g., green bonds), this issue will also consider broader techno-economic analysis as well as business model development with policy implications.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
