Progress in Alternative Fuels for Future Electrical Power System

Guest Editor:

Dr. Guohui Song

School of Energy and Power
Engineering, Nanjing Institute of
Technology, Nanjing, China

Deadline for manuscript
submissions:

closed (30 November 2023)

Message from the Guest Editor

One of the challenges of decarbonizing the power sector is sufficiently reducing greenhouse gas emissions while guaranteeing reliability, security, and affordability. Low-carbon alternative fuels, e.g., hydrogen, bio-methane, bio-methanol, ammonia, etc., can play crucial roles in the future power sector.

Topics of interest for publication include, but are not limited to, the following:

- alternative fuel production;
- alternative fuel-based energy storage;
- clean utilization technologies;
- system integration, optimization, and control;
- sustainability assessment

energies

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compindex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
