

Future Perspectives of Internal Combustion Engines of High Efficiency: Analysis, Modeling and Control Strategies and Application of Sustainable Fuels

Guest Editors:

Dr. Oscar Vento

Energy Department, Politecnico di Torino, 10129 Turin, Italy

Prof. Dr. Alessandro Ferrari

Energy Department, Politecnico di Torino, 10129 Turin, Italy

Deadline for manuscript submissions:

28 February 2025

Message from the Guest Editors

The aim of this Special Issue is to collect and disseminate the efforts of select researchers regarding analysis, modeling, and control strategies and the application of sustainable fuels in internal combustion engines.

Topics of interest for publication include, but are not limited to, the following:

- Strategies for monitoring and control injection and combustion events;
- Real-time and off-line modeling;
- Application of sustainable fuels;
- Combustion performance of green fuels and their blends;
- Spray technologies;
- Numerical and experimental analysis;
- Innovative techniques for emissions reduction;
- Advanced approaches to improve engine efficiency.

Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
