Latest Advances in Redox Flow Batteries for Solar Energy Storage

Guest Editors:

Prof. Dr. Dowon Bae

School of Engineering and Physical Sciences, Heriot-Watt University, Edinburgh EH14 4AS, UK

Prof. Dr. Emil Dražević

Department of Biological and Chemical Engineering, Aarhus University, DK-8200 Aarhus, Denmark

Deadline for manuscript submissions: closed (18 June 2021)

Message from the Guest Editors

Dear Colleagues,

We invite original research articles, short communications, as well as review, comment, and prospective articles addressing issues related to RFBs and PEC redox flow batteries, with a special focus on their development or application, including but not limited to new redox species, lifetime, PEC electrodes, electrolytes, catalysts, membranes, modelling, characterization techniques, system optimization, and industrial implications.

- solar redox flow battery
- photoelectrochemistry
- PEC flow cell
- electrochemical energy storage
- PEC energy conversion
- photovoltaics
- redox flow battery

Prof. Dr. Dowon Bae Prof. Dr. Emil Dražević *Guest Editors*

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
