Message from the Collection Editor

The purpose of this Review Special Issue is to offer the opportunity to communicate, through Review Papers, recent research advances in energy economics and policy as well as its possible future directions. In particular, it focuses on the innovation aspects of economics and policy of energy supply, trading, delivery and consumption, combining expertise in innovation theory, energy system organizations and institutions, as well as the wider policy and regulatory context of energy. This is particularly relevant in light of the scenario that has emerged as a result of the COVID-19 pandemic. Submissions are encouraged on—but not limited to—the following topics:

- Energy finance and markets;
- Energy demand and supply;
- Sustainable energy transition;
- Energy and environmental economics/policy;
- Energy policy;
- Energy generation, storage, distribution, and use;
- Relationships between energy and economic development.

Papers selected for this Review Special Issue will be subject to peer review, with the goal of a rapid and wide dissemination of research results.

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
