submissions:

**closed (15 January 2021)**

### Message from the Guest Editors

Dear Colleagues,

This Special Issue will aim at considering these concepts under the point of view of complex and emergent systems. This Special Issue covers original research and studies related to the above-mentioned topics, including, but not limited to, the following: innovative and cooperative robots, ensembles of micro- and nano-robot control, energy harvesting in robotics and automatic control systems, methods of energy saving and sharing in robots, alternative supply in robots, green energy-based robots, bio-inspired robots with emphasis on small devices, the coordination of flying and aerial robots, new materials for biomedical robots, and energy saving innovative controls for sustainable robots.

Prof. Dr. Luigi Fortuna

Dr. Arturo Buscarino

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
