

Steady-State Operation, Disturbed Operation and Protection of Power Networks 2021

Guest Editor:

Prof. Dr. François Vallée

Power Electrical Engineering
Unit, University of Mons,
Boulevard Dolez 31 7000 Mons,
Belgium

Deadline for manuscript
submissions:

closed (20 August 2021)

Message from the Guest Editor

Dear Colleagues,

This Special Issue will deal with novel optimization, forecasting, and computation techniques that improve the operation and protection of modern power systems. Topics of interest for publication include, but are not limited to the following:

- Optimization of operation of power systems;
- Impact of DERs and storage devices on power system operation;
- Application of AI techniques for an improved power system operation;
- Recent developments in protective equipment;
- New improved coordination schemes among protective devices;
- Power quality matters in modern power systems;
- Control methods of power electronics;
- New forecasting methods;
- Integration and impact of electric vehicles

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
