Smart and Innovative Solutions for Adaptive Facade Systems

Guest Editors:

Dr. Ricardo M. S. F. Almeida

1. Polytechnic Institute of Viseu,
Department of Civil Engineering,
Campus Politécnico de Repeses,
3504-510 Viseu, Portugal

2. CONSTRUCT-LFC, Department
of Civil Engineering, Faculty of
Engineering (FEUP), University of
Porto, Rua Dr. Roberto Frias s/n,
4200-465 Porto, Portugal

Dr. Eva Barreira

Department of Civil Engineering,
Faculty of Engineering (FEUP),
University of Porto, 4200-465
Porto, Portugal

Deadline for manuscript
submissions:

closed (16 August 2023)

Message from the Guest Editors

Adaptive Façade Systems (AFS) have the capacity to adjust their performance in response to different stimulus, making them a promising solution for reducing the energy consumption of buildings while improving the indoor thermal comfort.

Building regulations typically address the reduction of the energy demand by imposing high insulation levels and limiting airtightness. In mild climates, and, also, in cold climates due to climatic changes, this approach can however lead to discomfort issues, since, during the year, several periods occur in which an increased heat flux, towards the exterior, across the envelope would be beneficial...

This Special Issue aims at stimulating the exchange of ideas and knowledge on the use of smart and innovative solutions for adaptive façade systems.

Relevant topics to this special issue include, but are not limited to the following:

- dynamic insulation
- switchable windows
- adaptable shading systems
- active insulation systems
- new insulation materials
- smart technology towards an intelligent envelope.

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
