## Planning and Management of Sustainable Transport

Guest Editors:

**Prof. Dr. Ewa Glińska**

Faculty of Engineering  
Management, Białystok  
University of Technology, Wiejska  
45A, 15-351 Białystok, Poland

**Dr. Urszula Ryciuk**

Faculty of Engineering  
Management, Białystok  
University of Technology, Wiejska  
45A, 15-351 Białystok, Poland

**Dr. Halina Kirylyuk**

Faculty of Engineering  
Management, Białystok  
University of Technology, Wiejska  
45A, 15-351 Białystok, Poland

Deadline for manuscript  
submissions:  
**closed (31 August 2022)**

### Message from the Guest Editors

Transport has a very significant impact on energy consumption and emissions of environmental pollutants. Due to the limitation and depletion of natural resources (especially fossil fuels), as well as climate changes related to greenhouse gas emissions, sustainable transport is an important challenge for global development. Sustainable development of transport is focused on the simultaneous implementation of environmental, social and economic goals. Achieving these goals requires efficient transport management systems, including integrated and strategic planning.

This Special Issue covers the following topics:

- Policy and strategies towards sustainable transport
- Stakeholders participation in the management of sustainable transport
- Sustainable mobility in peripheral areas (also including areas attractive to tourists)
- Management of transport in smart cities
- Sustainable transport versus city branding

Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compindex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
