Deadline for manuscript  
submissions:

**closed (30 April 2023)**

### Message from the Guest Editors

Dear Colleagues,

Over the last two decades, the world has been shifting towards sustainable development that takes into account the relationship between nature, the economy and society. This concept emerged at the end of the 20<sup>th</sup> century, during an ongoing ecological crisis, acute environmental problems, an energy trap, and various social problems. Today, sustainable development is an intrinsic element not only of environmental policy, but also socioeconomic policy and various socioeconomic development strategies, on the global, national, regional, and local scales.

Sustainable development is supported primarily by the awareness of future problems related to nature and its resources, the economy, and society. Its implementation raises many questions: for example, the emergence of the concept of sustainable energy. A broad explanation of this concept is hard to identify. Sustainable energy is usually identified by the use of renewable energy sources (RES), but this approach should be considered an oversimplification.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
