Trends and Perspectives in Greenhouse Gas Emissions

Guest Editors:

Dr. Martin Cames

Energy & Climate Division, Öko-Institut e.V., Berlin, Germany

Dr. Alexander Zerrahn

Energy & Climate Division, Öko-Institut e.V., Berlin, Germany

Dr. Roman Mendelevitch

Energy & Climate Division, Öko-Institut e.V., Berlin, Germany

Deadline for manuscript submissions:

closed (31 March 2022)

Message from the Guest Editors

It is our pleasure to invite you to submit manuscripts to a Special Issue on “Trends and Perspectives in Greenhouse Gas Emissions”.

Fighting climate change requires cutting down greenhouse gas emissions, yet the “right” pace, sectoral, and regional distribution are highly debated among scholars, policymakers, and practitioners. To have a solid foundation, it must be clear what has driven greenhouse gas emissions in the past and what can effectively and efficiently drive them down in the future. This applies from the local to the global scale. At the same time, reducing emissions raises distributional questions, both regionally and between sectors.

Submissions with a clear connection to the overarching topic are welcome from the fields of economics, energy (system) studies, and related areas. Findings should be relevant to academic researchers, policymakers, or practitioners.

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
