

The Role of Energy in the Circular Economy

Guest Editors:

Dr. Eva María Buitrago Esquinas

Applied Ecomoy III, University of Seville, Avd. Ramón y Cajal nº 1, Avd. Ramón y Cajal nº1, 41018 Sevilla, Spain

Dr. Rocío Yñiguez Ovando

Economic Analysis and Political Economy, University of Sevilla, Avd. Ramón y Cajal nº1, 41018 Sevilla, Spain

Deadline for manuscript submissions:

closed (28 February 2022)

Message from the Guest Editors

Theoretical and empirical contributions addressing any aspect of these dimensions are welcome.

This Special Issue will include but is not limited to the following topics:

- Measures and initiatives on energy in order to minimize climate change, protect the environment, make efficient use of natural resources, protect and improve biodiversity, and promote a lifestyle that enhances positive environmental impacts;
- Promote measures on energy to reduce the circularity gap;
- Circular economy and energy: case studies;
- The rise of circularity in energy;
- Renewable energy in order to reduce raw material and carbon footprint;
- Efficiency in energy coupled with cleaner energy production technologies;
- Cleaner transport systems;
- Hydrogen, a clean fuel with no direct emissions of harmful pollutants or greenhouse gases;
- Ways to save energy;
- Metrics or indicators for reduction in energy consumption;
- Replacing fossil fuel;
- Strategies on implementation of waste-to-energy;
- Circular economy in energy infrastructure.

energies

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
