

Advances in Electrochemical Power Sources: Systems and Applications

Guest Editor:

Dr. Ioannis Kartsonakis

Physical Chemistry Laboratory,
School of Chemistry, Aristotle
University of Thessaloniki,
Thessaloniki, Greece

Deadline for manuscript
submissions:

25 February 2025

Message from the Guest Editor

Dear Colleagues,

This Special Issue aims to attract all researchers working in this research field and will collect new findings, operational features, and major types of electrochemical power sources and will provide future applications of devices. Research manuscripts, as well as review manuscripts, are encouraged in the following areas, but not limited to:

- Fuel cells;
- Batteries;
- Capacitors;
- Energy storage;
- Sustainable energy and engineering systems;
- Structure–properties relationship;
- Electrochemical solar energy conversion;
- Environmental effects;
- Applications;
- Recycling.

Dr. Ioannis Kartsonakis

Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
