Deadline for manuscript submissions:

closed (5 June 2024)

Message from the Guest Editors

Dear Colleagues,

The Special Issue of *Energies*, on the subject area of “End-user Level Models for Enhancing the Integration of Renewable Energy Sources”, is now open to submissions.

The goals set for achieving carbon-neutral power systems include, among the increased penetration of renewable energy sources and reduced greenhouse gas emissions, unlocking flexibility potential from the end-user’s side. The introduction of new market entities, such as aggregators and distributed sources of flexibility, results in more efficient power system operation, while energy communities and peer-to-peer trading directly contribute to the involvement of end-users in the low-carbon transition.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
