Deadline for manuscript submissions:

closed (18 May 2024)

Message from the Guest Editors

Dear Colleagues,

Electronic devices generate heat, and that heat must be dissipated. Effective thermal management is crucial to the optimal operation of electronic equipment and its health management. Recently, several intelligent techniques have emerged, showing great potential to address the growing need for better thermal management.

This Special Issue aims to provide a collection of the latest research and findings in the field of the Intelligent Control and Management of Thermal Energy for Electronic Equipment. Both research and review papers are welcome to be submitted to this Special Issue. Potential research topics include, but are not limited to, the following:

- Intelligent control strategy;
- Self-adaption thermal structure;
- Intelligent thermal modeling;
- Intelligent thermal design;
- High flux heat dissipation.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
