Advanced Online Condition Monitoring for Wind and Marine Energy Conversion Systems

Guest Editors:

Dr. Shahin Hedayati Kia

Laboratoire MIS, Université de Picardie « Jules Verne », 80000 Amiens, France

Prof. Dr. Hubert Razik

Laboratoire Ampère, UNCBL Lyon 1, ECL, INSA, CNRS, Université de Lyon, 69100 Villeurbanne, France

Deadline for manuscript submissions:

closed (30 December 2022)

Message from the Guest Editors

The subject of interest of this Special Issue is the newly developed advanced techniques for online condition monitoring of wind and marine energy conversion systems. Furthermore, the development of high-fidelity hardware-in-the-loop (H-i-L) facilities with the main aim of real-time evaluation of the developed techniques at low cost is included. The potential papers for publication may cover, but are not limited to, the following topics:

- Wind and marine generators condition monitoring;
- Multistage gearbox and bearing condition monitoring;
- Online condition monitoring in time-varying working conditions;
- Physical modeling of incipient faults in the wind and marine drive-train components;
- Implementation of fault detection, diagnosis and prognosis algorithms in real-time platforms;
- Real-time digital simulation of wind and marine energy conversion systems;
- Hardware-in-the-loop facilities for real-time evaluation of condition monitoring methods.

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
