# **Advances in Coal and Water Co-mining**

Guest Editor:

### Prof. Dr. Qiangling Yao

School of Mines, China University of Mining and Technology, Xuzhou, China

Deadline for manuscript submissions:

closed (1 September 2023)

## **Message from the Guest Editor**

This Special Issue aims to present research and review articles on coal and water co-mining. The focus will be on the orderly, rational and efficient planning and use of water resources to meet the needs of different mining stages from the perspective of the whole mining cycle, to achieve coal–water co-mining and thus effectively improve the ecological environment of coal mining areas.

The topics of interest include, but are not limited to, the following:

- Geological condition survey identification;
- Evaluation of hydrogeological conditions;
- Slope stability control technology;
- Relationship between vegetation and groundwater level;
- Structural protection of water-bearing (septic) seams during coal mining;
- Surface and groundwater reservoir technology;
- Coal and water co-mining technology;
- Mechanisms of water-coal (rock) interactions;
- Integrated use of mining water resources;
- Water damage control in coal mines;
- Detection and prediction of the height of the hydraulic fracture zone;
- Influence mechanism of ecological environment in mining area;
- Mine land reclamation and ecological reconstruction technology.

## **Editor-in-Chief**

#### Prof. Dr. Enrico Sciubba

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
