Deadline for manuscript
submissions:

closed (21 November 2022)

Message from the Guest Editor

Dear Colleagues,

Energy storage and conversion systems represent a very broad topic, and the use of nanofluids in such applications is rapidly developing through multidisciplinary approaches. This Special Issue aims to motivate researchers who have recently been exploring areas related to energy storage and conversion systems that utilize novel aspects of nanofluids, including methods for modification, advanced characterization and the use of additives for tuning properties, including—but not limited to—rheology, thermal, electrical and ionic conductivity. We invite authors to submit their original research articles, review articles and perspective articles pertaining to the use of nanofluids in energy storage and conversion devices.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
