Deadline for manuscript
submissions:

closed (4 April 2022)

Message from the Guest Editor

Dear Colleagues,

Biodiesels and their fossil-fuel blends have now become essential bridges to the next level of renewable energy resources. It is therefore not surprising that much research continues to be done on biodiesel fuels and processes associated with their combustion. Hence, this Special Issue is motivated by the desire to collate relevant findings and solutions.

Original research findings on biodiesels for combustion will be reviewed and organised with the aim to inform a broad range of beneficiaries of the recent developments, and to provide critical analysis of the current state-of-art biodiesel fuel technologies. All articles featured in this issue will be free to view to maximise the readability and benefits to public.

Dr. Mansour Al Qubeissi

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
