## Bio-Energy Reviews

Collection Editors:

**Prof. Dr. Fernando Rubiera González**

Institute of Carbon Science and Technology, INCAR-CSIC, 26 Francisco Pintado Fe, 33011 Oviedo, Spain

**Dr. Covadonga Pevida García**

Institute of Carbon Science and Technology, INCAR-CSIC, 26 Francisco Pintado Fe, 33011 Oviedo, Spain

### Message from the Collection Editors

Energy production from renewable sources satisfies the three requirements of accessibility, supply security, and environmental sustainability. It is recognised that bioenergy will be pivotal in any decarbonisation strategy as a sustainable alternative to the energy generated from fossil fuels. As contemplated in the Bio-Energy Section of the journal, the generation of bioenergy from biofuels offers several advantages, particularly those associated with CO<sub>2</sub> life-cycle neutrality, in order to reduce the energy production impact on the greenhouse effect and global warming. Likewise, unlike most other renewable energy sources, bioenergy can generate both heat and electricity with a high efficiency in combined heat and power (CHP) plants. This Special Issue aims at collecting the latest advances in bioenergy research. It welcomes review papers and case studies, related to all aspects of bioenergy production and use, including the treatment of feedstocks, biomass conversion technologies, all the range of biofuels for vehicles, and new trends and latest discoveries in aviation biofuels. For more information, see the scope of the Bio-Energy Section in *Energies*.

Aerospace Engineering,  
University of Roma Sapienza, Via  
Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
