Biomass Conversion Technologies

Guest Editor:

Prof. Dr. Prasad Kaparaju

Griffith School of Engineering and Built Environment, Griffith University, Nathan Campus, Nathan, QLD 4111, Australia

Deadline for manuscript submissions:

closed (15 January 2021)

Message from the Guest Editor

Advanced and innovative biomass conversion technologies play a crucial role in renewable energy development and the replacement of fossil fuels and chemicals in achieving environmental sustainability. This Special Issue aims to publish a comprehensive overview and in-depth technical research papers addressing the recent progress in biomass conversion technologies and processes. Studies of advanced technologies and methods for bioenergy, biorefinery, and biofuel production are also welcomed. Research involving experimental and numerical studies, recent developments, and the current state of the art and emerging technologies in this field are highly encouraged.

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
