Spain

Deadline for manuscript
submissions:

closed (31 January 2020)

Message from the Guest Editor

Renewable energy deployment as an alternative to traditional energy sources is the cornerstone of the emission-reduction energy policies aimed at facilitating the transition to a low-carbon economy. This transition poses risks and opportunities for companies with business models that rely directly or indirectly on renewables, which will be reflected in the revaluation of assets and in the reallocation of private and public financial investments from carbon-intensive to low-carbon energies. This Special Issue focusses on the current challenges and opportunities for renewable energies, both at the theoretical and empirical level, regarding public policies, financing, competition, trade, technology innovation, market interdependence, and pricing in renewable energy markets. Related topics might be considered so long as they are related to challenges of renewables deployment.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
