2. Russian Academy of Engineering (RAE), Gazetniy pereulok, 9-4125009 Moscow, Russia

Deadline for manuscript submissions:

**closed (20 December 2022)**

### Message from the Guest Editor

Dear Colleagues,

Global climate change has long ceased to be an exclusively scientific or environmental subject. It also has gained importance in the internal affairs and foreign policy of different countries, transnational corporations, and global financial conglomerates. Environmental concerns have been a topical issue for a relatively long time, but only today are we moving into the phase of direct actions to transform the philosophy of conducting business itself.

This Special Issue would like to encourage original contributions regarding the latest developments and ideas relating to decarbonizing the global economy, sources of financing green transformation, including transition to sustainable economic growth, and formation of a new culture for responsible business. This will noticeably reduce carbon dioxide emissions, which in the long run will reduce the burden on the environment and allow time for the transition to the next generation of energy resources.

Prof. Dr. Zhanna Pisarenko

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
