Deadline for manuscript  
submissions:

**closed (24 May 2022)**

### Message from the Guest Editor

For this Special Issue of *Energies* (IF: 3.004) entitled “New Frontiers in Chemical Looping Technology for Fuel Conversion”, we would like to encourage original contributions regarding the scale-up of chemical looping processes and new applications of chemical looping. Potential topics include, but are not limited to: the development of oxygen carriers; the design and operational experiences of chemical looping reactors and plants; the development of chemical looping processes under pressurized conditions; chemical looping processes for hydrogen and syngas production; the chemical looping conversion of biofuels; chemical looping modelling and process simulation; techno-economic analysis of chemical looping technologies; chemical looping for high-temperature thermochemical energy storage; chemical looping deoxygenation; chemical looping epoxidation; methane-to-methanol via chemical looping; chemical looping partial oxidation; application of chemical looping in mitigating ventilation air methane (VAM) emissions; chemical looping oxidative dehydrogenation; chemical looping for the oxidative coupling of methane; chemical looping selective oxidation; etc.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
