Vrata 2, SI-6101 Koper-  
Capodistria, Slovenia

Deadline for manuscript  
submissions:

**closed (31 March 2023)**

### Message from the Guest Editor

This Special Issue invites articles that investigate environmental policy in the electricity market and different drivers of volatilities in the energy and electricity markets. Consequently, different country and cross-country studies are welcome addressing environmental policy and functioning of electricity markets at producer, wholesale, and retail levels, as well as in international cross-border trade and energy exchange markets.

The environmental policy, development, and functioning of electricity markets are important for the sector sustainability, revenues of suppliers, and for expenditures of different structures of consumers in households, and costs in industry and public utilities, which can be addressed by different empirical evidence and research methods.

Based on the analysis of changes and evolution in the development of environmental policy and the electricity market, implications can be derived for science and further research, sustainability, competition and other government policies, and managerial and consumer practices.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
