# Environmental and Energy Assessment of Alternative Fuels

Guest Editor:

**Dr. Suhan Park**
School of Mechanical Engineering, Chonnam National University, Gwangju 61186, Republic of Korea

Deadline for manuscript submissions:
**closed (29 February 2020)**

## Message from the Guest Editor

Dear Colleagues,

In this Special Issue, we would like to provide our readers with various research results on the applicability of alternative fuels, environmental assessment, and energy balance applied throughout industries such as automotive, plant, and power generation fields.

As Guest Editor of the *Energies* Special Issue on "Environmental and Energy Assessment of Alternative Fuels", I warmly invite you to submit your relevant research results in the field for consideration for publication. This Special Issue represents a unique opportunity to gather the most recent advances on the application of alternative fuels in the fields of automobiles, plants, power generation, and so on.

The topics that may be addressed in this Special Issue include (but are not limited to):

- The application of alternative fuels (biofuels, DME, liquid petroleum gas, gas-to-liquid, etc.) to automobile vehicles, plants, and power generation systems
- The production and assessment of alternative fuels
- The impact of alternative fuels on environments (emissions, greenhouse gas, etc.)
- The life cycle analysis of alternative fuels

Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.
**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.
**Journal Rank:** CiteScore - Q1 (Control and Optimization)
