

## Environmental and Health Impacts of Renewable Energies

Guest Editors:

**Prof. Dr. Gheorghe Badea**

**Dr. Eng. Raluca Andreea  
Felseghi**

**Dr. Ioan Aschilean**

**Dr. Maria Simona Raboaca**

Deadline for manuscript  
submissions:

**closed (10 January 2023)**

### Message from the Guest Editors

Dear Colleagues,

With the awareness that traditional fossil energy resources are limited, depletable and polluting, the idea of exploitation and widespread use of alternative energy generation resources has been implemented. Energy is the driving force of civilization and technical-scientific and economic evolution. With the identification of the current situation related to the limited availability of traditional energy resources, climate change and the negative influence of the energy sector on the environment and human health, a number of principles have been established underpinning sustainable development in this area. Thus, special emphasis is placed on the use of alternative and renewable energy sources, characterized by a positive impact on the environment and human health.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
