# **Exergy Analysis of Energy Systems 2017**

Guest Editor:

#### Prof. Dr. Tatiana Morosuk

Chair of Exergy-based Methods for Refrigeration Systems, Technische Universität Berlin, Marchstraße 18, 10587 Berlin, Germany

Deadline for manuscript submissions:

closed (15 January 2018)

## Message from the Guest Editor

Dear Colleagues,

This will be the second Special Issue focused on the application of exergy analysis and exergy-based methods applied for the evaluation, improvement, and optimization of different energy-conversion systems.

Exergy analysis is recognized as the most effective tool for evaluating the quality of energy carriers, the inefficiencies in energy-conversion or energy-intensive chemical processes, and the rational use of energy.

Research contributions in the area of developing and extending exergy-based methods, as well as the application of these methods to the wide range of energy systems, are invited.

Prof. Dr. Tatiana Morosuk Guest Editor

### **Editor-in-Chief**

#### Prof. Dr. Enrico Sciubba

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

### Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
