Deadline for manuscript
submissions:

closed (30 November 2023)

Message from the Guest Editors

Dear Colleagues,

This Special Issue aims at collecting papers analyzing different aspects of the changes of energy use in the 21st century. The editors welcome theoretical and empirical papers from a wide range of different disciplines. To understand household energy use, we need new inter- and transdisciplinary approaches, and we need to combine the available knowledge around the topic; thus, this call is open to papers in natural sciences and engineering, but also transformation and transition sciences, ecology, social science, and humanities. This issue has a special focus, among others, on the impact of the COVID-19 pandemic on household energy use.

Contemporary policies aim at encouraging households to lower energy consumption; we are therefore especially interested in social, political, economic, and psychological constructs around energy use, and external and internal barriers of energy efficiency. Papers can also focus on the institutional level of energy use, analyzing relevant policies or strategies of decisionmakers, energy providers, and civil associations.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
