Developing Technologies for Fuels Production

Guest Editors:

Dr. Dushyant Shekhawat

National Energy Technology
Laboratory, Morgantown, WV,
USA

Dr. Swarom Kaniitkar

National Energy Technology
Laboratory, Morgantown, WV,
USA

Dr. Daniel Haynes

National Energy Technology
Laboratory, Morgantown, WV,
USA

Deadline for manuscript
submissions:

closed (31 December 2021)

Message from the Guest Editors

This Special Issue seeks to contribute to fuel production technologies through enhanced scientific and multi-disciplinary knowledge, thereby bringing into focus the changing energy landscape so as to meet technical, socio-economic, and environmental goals, in addition to energy security. We, therefore, invite papers on innovative technical developments, reviews, case studies, papers from different disciplines that are relevant to catalyst development, characterization, and evaluation in the areas including direct natural gas conversion (non-syngas), light hydrocarbon reforming (C₁–C₄), ammonia synthesis, Fisher–Tropsch (F–T) synthesis, and coal gasification. Studies are encouraged that offer new types of catalysts, alternative conversion methods (microwave, plasma), molecular and atomic modeling, or system analysis studies that are relevant to the conversion of the mentioned hydrocarbon fuels.

Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
