Development of Sustainable Energy: Generation Technologies and Concepts

Guest Editors:

Prof. Dr. Tariq Muneer

School of Engineering and the Built Environment, Edinburgh Napier University, Edinburgh, UK

Dr. Mehreen Saleem Gul

Institute of Sustainable Building Design, School of Energy Geoscience Infrastructure and Society, Heriot-Watt University, Edinburgh EH14 4AS, UK

Prof. Dr. Eulalia Jadraque Gago

Engineering Construction and Project Management, School of Civil Engineering, University of Granada, Granada, Spain

Deadline for manuscript submissions:

closed (30 June 2020)

Message from the Guest Editors

Lack of access to energy supplies and transformation systems is a constraint to human and economic development. Achieving solutions to environmental problems that we face today requires long-term potential actions for sustainable development. Sustainable energy generation should be widely encouraged, as it does not cause any harm to the environment and is widely available free of cost.

The challenge is, however, far from being solved, and there needs to be more access to clean fuel and technology. Furthermore, more progress needs to be made regarding integrating sustainable energy into end-use applications in sectors such as building, transport and industry.

This edition of the *Energies* journal addresses the barriers and challenges faced with regards to sustainable energy generation for future energy technologies and concepts, and highlights potential solutions that should lead towards sustainable development.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
