Message from the Guest Editor

Dear Colleagues,

This Special Issue of *Energies* is open to all researchers who wish to share their progress in the field of exergy cost accounting applied to the analysis of new energy systems or to compare their exergetic economic performance. It is very much hoped that this space will serve as a springboard to further divulge the potential of this type of analysis.

Keywords:

- Exergy cost
- Renewable sources
- Exergoeconomics
- Power generation
- Environment

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
