Green Economy and Sustainable Development

Guest Editors:

Prof. Dr. Sergey Zhironkin

1. Department of Economics,
National Research Tomsk
Polytechnic University, 634050
Tomsk, Russia

2. Department of Economy and
Planning, Siberian Federal
University, 660075 Krasnoyarsk,
Russia

Prof. Dr. Michal Cehlar

Technical University of Kosice,
Faculty of Mining, Ecology,
Process Control and
Geotechnologies, 042 00 Košice,
Slovakia

Deadline for manuscript
submissions:

closed (1 February 2022)

Message from the Guest Editors

At present, increased environmental requirements for the development of industry, especially the key branches, are facilitating changes in the structure of the global economy, propelling the countries and companies that are most active in promoting environmental innovations to the top of the competition. The green economy is facing the challenge of not only preserving the environment, but also ensuring sustainable development as a comprehensive satisfaction of human needs in modern goods and improving the ecosystem. An important role in this process belongs to the technological development of mining and processing of minerals, the revitalization of depleted deposits, and the development of revolutionary new sources of energy. The purpose of the Special Issue is to unite the efforts of researchers from all over the world to expand a pluralistic vision of the problems of green economy and sustainable development, innovative development of technologies for integrated extraction, and non-waste processing of minerals.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
